The adjusted NICS data presented above was derived by NSSF by subtracting out NICS purpose code permit checks used by several states such as KY and UT for CCW permit application checks as well as checks on active CCW permit databases. While not a direct correlation to firearms sales, the NSSF adjusted NICS data provides a more accurate picture of current market conditions. Questions concerning NSSF adjusted NICS data should be directed to NSSF research at (203) 426-1320 or research@NSSF.org. In addition to other purposes, NICS is used to check transactions of firearms sales and transfers on new and used handguns and long guns.

\*Aug. 2016 – NSSF adjusted the total figure reported for Illinois from 93,310 to 33,000. Illinois had checks counted multiple times and the FBI NICS unit confirmed inflated data for the state.
